ABOUT

Full-stack AI engineer with 4.5+ years shipping production LLM integrations, multi-provider RAG systems, and agent workflows (OpenAI, Claude, Gemini) from architecture to AWS. Currently VPoE at an AI-first startup in Tokyo — leading 12 engineers, owning end-to-end architecture of an enterprise multi-LLM platform, and fluent in Japanese (日本語).

EXPERIENCE

VP of Engineering & Full-Stack AI Lead · 12-eng startup
Nov 2024 — Present
BrandCloud Inc. (NDI Division) · Tokyo, Japan

- Architected **KnowledgeLinks AI** — multi-tenant enterprise RAG system (OpenAI, Claude, Gemini) with sub-second streaming, source-cited answers, and LangSmith-monitored evaluation pipelines on AWS
- Authored AI-first technical roadmap; drove adoption of LangGraph agent workflows, RAG, and LLM eval from zero to production across the full product stack
- Lead 12 engineers across BE/FE/mobile (promoted Engineer → VPoE in 26 months); own AWS infrastructure, CI/CD, and Docker + GitHub Actions workflows

Senior Software Engineer
Oct 2023 — Oct 2024
BrandCloud Inc. · Tokyo, Japan

- Led full-stack build of **Benrimono** — on-demand delivery app with real-time GPS, push notifications, and serverless AWS backend (Lambda + DynamoDB) for iOS & Android
- Introduced the company's first production LLM integrations; established prompt engineering and LLM API patterns adopted company-wide; directly mentored 3 junior engineers

Software Engineer
Sep 2022 — Sep 2023
BrandCloud Inc. · Tokyo, Japan

- Built and maintained Django REST APIs and React / Vue.js UIs across production services; optimised PostgreSQL schemas and Redis caching strategies for high-read endpoints
- Containerised all services with Docker; improved CI pipeline reliability and increased test coverage, measurably reducing production regressions

Trainee Engineer
May 2022 — Sep 2022
B-JET · Japan

- Intensive program in software craftsmanship, Agile delivery, and cross-cultural communication; built conversational Japanese proficiency

Software Engineer Intern
Nov 2021 — Apr 2022
W3Engineers Ltd. · Bangladesh

- Shipped production features across Go, Flask, Node.js/Express, and Vue.js for 3+ client projects, delivering on deadline in a fast-paced agency environment

SELECTED PROJECTS

KnowledgeLinks AI · RAG System
Django · Next.js · OpenAI · LangSmith · AWS · Docker
Multi-tenant RAG platform — sub-second streaming, cited answers, and LangSmith eval pipelines across 3 LLM providers on AWS.
